PROFESSIONAL SUMMARY

Incoming third-year Bachelor of Science in Information Technology (BSIT) student at STI College Dagupan with a strong interest in software development, web development, mobile application development, and emerging technologies. Experienced in developing academic and personal projects utilizing Java, Python, Flutter, SQL, Firebase, RFID systems, and facial recognition technology. Passionate about building practical software solutions that solve real-world problems while continuously improving technical and professional skills.

EDUCATION

STI College Dagupan

2024 – Present | Expected Graduation: 2028

- Relevant Areas of Interest:
- Software Development
- Mobile Application Development
- Web Development
- Machine Learning
- Database Systems

Feliz Academy Inc.

2022 – 2024

- Graduated with High Honors

TECHNICAL SKILLS

Programming Languages:

- Java, Python, C#, SQL, Dart (Flutter)

Frameworks & Technologies:

- Flutter, Firebase, SQLite, RFID Systems, Facial Recognition Systems

Development Tools:

- Git, GitHub, Visual Studio Code, Android Studio, MySQL, XAMPP

Design & Productivity:

- Figma, Canva, Microsoft Word, CapCut, Zoom

Professional Skills:

- Problem Solving, Communication, Adaptability, Team Collaboration, Attention to Detail, Time Management

PROJECTS

Gym Management System

Java | SQLite | Firebase

Developed a comprehensive gym management application designed to streamline gym operations and member management.

- Key Contributions:
- Implemented CRUD functionality for member records
- Developed attendance monitoring features
- Built payment tracking and dues management modules
- Created expense calculation and tracking functionality
- Integrated Firebase authentication and cloud database services

Budget Management Application (In Development)

Flutter | Firebase | SQLite

Currently developing a personal finance application that helps users monitor expenses and manage budgets effectively.

Current Features:

- Expense tracking
- Daily allowance allocation
- Spending limit monitoring
- Budget utilization progress tracking

Planned Features:

- Savings goals
- Budget categories
- Monthly reports
- Analytics dashboard
- Smart notifications
- AI-powered financial recommendations

RFID Attendance System with Facial Recognition

Python | Machine Learning | RFID

Collaborated in the development of an intelligent attendance monitoring system utilizing RFID technology and facial recognition.

Key Contributions:

- Implemented facial recognition functionality
- Automated attendance verification processes
- Assisted with machine learning integration
- Contributed to system testing and optimization

ACHIEVEMENTS

First Runner-Up – Codefest 2026

STI College Dagupan

- First Runner-up of the institution's programming competition, demonstrating problem-solving, teamwork, and software development skills.

Champions – Director's Cut 2025 & 2026

STI College Dagupan

- Secured back-to-back championships as the lead actor; demonstrated extreme adaptability and resilience in the 2026 competition by successfully pivoting to a solo performance due to sudden cast shortages.
